Library of Congress Cataloging-in-Publication Data

Names: Money, Nicholas P., author.

Title: The rise of yeast : how the sugar fungus shaped civilization /  
Nicholas P. Money.

Description: New York, NY : Oxford University Press, [2018] | Includes bibliographical references  
and index.

Identifiers: LCCN 2017022904 | ISBN 9780190270711 (hardback : alk. paper)  
ebook ISBN 978-0-19-027073-5

Subjects: LCSH: Yeast. | Microorganisms.

Classification: LCC QR151 .M73 2018 | DDC 579—dc23 LC record available at  
<https://lcn.loc.gov/2017022904>

## ACKNOWLEDGMENTS

Contemporary publications on yeast were accessed through the online resources furnished by the Miami University Libraries in Oxford, Ohio. Older studies were located in the outstanding collection of books and manuscripts in the Lloyd Library and Museum in Cincinnati. Information on the Fleischmann family was unearthed in the Cincinnati History Library and Archives. Sincere thanks to my scientific research partner, Mark Fischer, for lending his artistry to many of the illustrations in this book.

# CONTENTS

## *List of Illustrations*

1. Introduction: Yeasty Basics
2. Yeast of Eden: Drink
3. The Dough Also Rises: Food
4. Frankenyeast: Cells
5. The Little Yeast on the Prairie: Biotechnology
6. Yeasts of the Wild: Yeast Diversity
7. Yeasts of Wrath: Health and Disease

# LIST OF ILLUSTRATIONS

1. Scanning electron micrograph of the sugar fungus, *Saccharomyces cerevisiae*  
Kathryn Cross, Institute of Food Research and the National Collection of Yeast Cultures;  
<<https://creativecommons.org/licenses/by/4.0/>>  
>
2. *Saccharomyces cerevisiae*  
M. Rees, *Botanische Untersuchungen über die Alkoholgährungspilze* (Leipzig, Germany: Arthur Felix, 1870)
3. Diagram of sugar metabolism in yeast  
Illustration by Mark Fischer, Mount St. Joseph University, Cincinnati.
4. Life cycle of *Saccharomyces cerevisiae*  
Illustration by Mark Fischer, Mount St. Joseph University, Cincinnati.
5. Roland Thaxter's illustration of flasks, or thalli, of Laboulbeniales (ascomycete fungi) that grow on the exoskeleton of beetles and other insects  
R. Thaxter, *Memoirs of the American Academy of Arts and Sciences* 13, 217–649 (1908)
6. Pen-tailed treeshrew, *Ptilocercus lowii*  
Illustrated by J. Wolf in J. E. Gray, *Proceedings of the Zoological Society of London*, 23–4 (1848)
7. Sunda slow loris, *Nycticebus coucang*  
Universal Images Group North America LLC/Alamy Stock
8. Loaf of bread fossilized at Pompeii  
Ancient roman fossilized bread, year 76 or 79 AD, from Pompeii, Italy. Jebulon/CC0 1.0
9. Details from Fleischmann's yeast advertisement published in 1931  
Author's collection
10. Simple diagram of a eukaryotic cell  
Illustration by Mark Fischer, Mount St. Joseph University, Cincinnati
11. Electron micrograph of freeze-fractured yeast cells  
Courtesy of Gerhard Wanner, LMU Munich, Faculty of Biology; Creative Commons Attribution-Share Alike 2.0 license
12. *Monosiga gracilis*, a species of choanoflagellate  
W. Saville Kent, *A Manual of the Infusoria*, vol. 3 (London: D. Bogue, 1880–2)
13. The flow of energy and the absorption and release of CO<sub>2</sub> associated with the production and consumption of bioethanol produced from corn  
Illustration by Mark Fischer, Mount St. Joseph University, Cincinnati
14. Modern bioethanol plant  
zych/123RF
15. Sugarcane field in Brazil

casadaphoto/123RF

16. [Mirror image of the salmon-pink colony of the mirror yeast \*Sporobolomyces\*](#)  
Alexander Idnurm, University of Melbourne
17. [Ascospore discharge in the predacious yeast \*Metschnikowia\*](#)  
Adapted from M.-A. Lachance et al., *Canadian Journal of Microbiology* 22, 1756–61 (1976) and M.-A. Lachance et al., *Canadian Journal of Microbiology* 44, 279–88 (1998) © 2008 Canadian Science Publishing or its licensors. Reproduced with permission.
18. [Exudation of spores from the elongated ascus of the yeast \*Dipodascus\*](#)  
Illustration by Mark Fischer, Mount St. Joseph University, Cincinnati
19. [Mesmerizing illustration of the ascomycete fungus \*Pyrenophora polytricha\*](#)  
L. R. Tulasne and C. Tulasne, *Selecta Fungorum Carpologia*, 3 volumes (Paris: Imperatoris Jussu, In Imperiali Typographeo Excudebatur, 1861–5)
20. [Scanning electron microscope image of the fission yeast, \*Schizosaccharomyces pombe\*](#)  
Kathryn Cross, Institute of Food Research and the National Collection of Yeast Cultures;  
<<https://creativecommons.org/licenses/by/4.0/>>  
>
21. [Candida albicans, the vaginal yeast](#)  
Tatiana Shepeleva/123RF
22. [Brain infection caused by the yeast \*Cryptococcus neoformans\*, in a patient with AIDS](#)
